COOLIDGE RARE PLANT GARDENS, INC.
PASADENA, CALIFORNIA

Memorandum

After you have selected your present requirements please file the attached list for future reference. You will find therein many new varieties (fully tested in our experimental grounds over a number of years) imported through government and private agencies from all parts of the world.

All progressive Nurserymen fully realize the importance of maintaining a good stock of the latest and best varieties, particularly in these days of keen competition.

This Company has specialized in novelties since its incorporation, in 1911, and has introduced and disseminated a large number of the most popular varieties now in general use.

The enclosed pamphlet on the I. X. L. Rose Stock is worthy of your special consideration.

With an increased acreage, larger capital, and a competent and scientifically trained staff, we are in a position to offer you a SERVICE satisfactory from every standpoint.

Mulchings

mulchings are applied to trees and shrubs to help them grow well, to keep the soil moist and to prevent weeds from growing. (see "How to Mulch" in the "How to Care for Your Garden" section of this catalog for more information on mulching.)
